## BEARS

## SUPPLIES

White Cardstock  
Washable Ink Pad or Paint  
Extra Large Clear Glass Gems  
Scissors  
Mod Podge  
Foam Brush  
Magnets

# INSTRUCTIONS

Leave a mark this Valentine's Day with this cute DIY magnet activity. Not only is it super simple, but it's a great way to turn your child's fingerprint into a forever keepsake on the fridge!

1. Press finger into ink or paint and gently press finger onto the cardstock. Reapply and tilt finger slightly before pressing down again to make a heart.

2. Allow fingerprints to dry completely, then go ahead and apply mod podge to the flat side of the gem and press it on top of the heart. Not too much, as it will smudge the fingerprint.

3. Allow the glue to dry. Using a pair of scissors, trim off extra cardstock. Apply mod podge to the magnet and onto the back of cardstock.

4. Allow magnets to dry before displaying them on your fridge!
